PROFESSIONAL SUMMARY

Full-Stack Software Developer at TCS with 1+ year of experience building and maintaining enterprise insurance applications using Java, Spring Boot, and Angular. I enjoy working across the stack — from writing optimised database queries and REST APIs on the backend, to fixing tricky UI bugs and improving component performance on the frontend.

WORK EXPERIENCE

Tata Consultancy Services (TCS) | TCS BaNCS — Health Insurance Platform

Software Developer | Java • Spring Boot • Angular • Microservices • PostgreSQL

July 2024 – Present

- Engineered and maintained large-scale **Angular** modules for the TCS BaNCS health insurance platform, resolving critical UI bugs and optimising component rendering performance across **Policy Management** and **Claims Management** workflows, directly enhancing end-user experience and system reliability.
- Built **RESTful APIs** using **Spring Boot** — covering CRUD operations, file upload/download, XML generation, and Excel processing. These APIs were used across multiple insurance modules to move data between services reliably.
- Optimised backend data persistence using **Hibernate (JPA)** and **JDBC**, crafting 10+ performance-tuned **PostgreSQL** queries and applying composite indexing strategies — improving query execution speed by approximately **20–25%** and enhancing system responsiveness across high-volume data operations.
- Mentored 2 junior developers**, guiding them through onboarding, codebase familiarisation, and development best practices — accelerating their project readiness and strengthening overall team capability.

SKILLS

Programming Languages: Java, JavaScript, TypeScript

Frameworks & Libraries: Spring Boot, Spring MVC, Hibernate, Spring Data JPA, Angular

Databases: PostgreSQL, MySQL

Tools & Version Control: Git, GitHub, IntelliJ IDEA, Eclipse, VS Code, JasperReports

ACHIEVEMENTS

Star of the Month & On the Spot Award — January 2026, TCS

Recognised for exceptional contributions to a high-stakes client demo project that successfully attracted a major enterprise client, directly contributing to business growth for the organisation.

GATE 2024 Qualified — Computer Science & Information Technology

Cleared one of India's most competitive national engineering exams, demonstrating strong CS fundamentals and analytical ability beyond core ECE background.

AIR 1531 — TCS CodeVita Season 12 (2023–24)

Ranked AIR 1531 among 300,000+ global participants in one of the world's largest programming competitions, demonstrating strong problem-solving and competitive coding skills.

500+ Problems Solved — LeetCode & GeeksForGeeks

Consistent competitive programmer with 500+ problems solved across Data Structures and Algorithms, reflecting strong coding fundamentals and interview readiness.

PROJECTS

E-Commerce Web Application | [Link](#)

Tech Stack: React JS, JavaScript, Context API, JSON-Server, Tailwind CSS

- Built a fully functional e-Commerce web application featuring secure user authentication, dynamic product browsing with advanced filtering, and a complete order management system — deployed with a sleek dark-mode UI for enhanced user experience.
- Leveraged React Context API for efficient global state management, ensuring seamless, consistent user experience across all components without prop drilling. Used JSON-Server to simulate a RESTful backend for user order persistence.

AI-Powered Portfolio Website with Chatbot | [Link](#)

Frontend: Next.js 15, React 18, TypeScript, Tailwind CSS, shadcn/ui | Backend: Python, FastAPI, Mistral AI, PyPDF2

- Built a full-stack portfolio website with a Next.js 15 and TypeScript frontend deployed on Vercel, featuring dark/light theme toggle, WCAG accessibility compliance, and a fully responsive layout across all device sizes.
- Developed a Python backend integrated with Mistral AI that dynamically fetches and parses the live resume PDF at runtime using PyPDF2 — enabling recruiters to interact with an AI chatbot that answers questions about skills, projects, and experience through a multi-turn conversation interface.

EDUCATION

Heritage Institute of Technology, Kolkata

B.Tech — Electronics and Communications Engineering | CGPA: 8.70 / 10

2020 – 2024

Kendriya Vidyalaya Kankarbagh

Class XII — CBSE (All India Senior School Certificate Examination) | 84.8%

2019
